

# HOW TO SORT **packaging and paper**

1

**IT'S A PACKAGING  
OR A PAPER?**

PLACE IT IN YOUR  
YELLOW BAG

2

**NO WASHING,  
JUST EMPTY IT**

3

**PLACE IT IN THE  
SORTING BIN OR  
DROP IT OFF FOR  
THE WASTE  
COLLECTION**

## TO BE SORTED

**ALL PLASTIC,  
METAL,  
CARDBOARD  
PACKAGING  
AND PAPER**

**OTHER WASTE TO BE TAKEN TO AN APPROPRIATE COLLECTION POINT**

Find all the sorting instructions  
for your area on the App

Sorting  
guide

CITEO

You can now sort **all your plastic packaging** as well as **paper and packaging made of cardboard, aluminium, steel or glass.**

Food or drink bottles

Dispenser bottles and large containers

Trays

Pots and boxes

Bags and packets

Films

### **SORT IT RIGHT:**

**Empty it out, don't wash it, put it in your yellow bag, separated from each other. Then, place your yellow bag in the sorting bin or drop it off for trash collection.**

## **More packaging sorted = More materials reused**

**1** You sort **all your plastic packaging.**

**2** It is then collected and taken to a sorting centre.

**6** New end products are made.

**New packaging  
Manufactured products**

The materials are shredded into flakes and granulate.

Non-recyclable packaging is sent for energy recovery (district heating).

Some plastic bales are sent to innovative recycling facilities, currently being developed.

**3** The sorting centre separates the different materials into bales.

**4a** Some plastic bales are sent to a recycling plant.
